WHO WE ARE

The Durable Deck

Think wood made tougher. Our TimberTech® decking has the look and feel of traditional wood, with the added strength and durability of a composite material.

We Know Durable Decks

TimberTech capped composite decking is tough enough to resist mold, mildew, stains, and scratches. We back that strength with our limited 25-year fade and stain warranty on Legacy, Tropical, and Terrain Collections, as well as our 25-year limited warranty that covers material defects resulting in splinters and damage from termites or rot on all TimberTech decking. That's how we fulfill our mission of building America's most enduring, durable, and enjoyable outdoor living spaces. TimberTech is part of AZEK Building Products, the industry leader in performance building materials with more than 30 years of manufacturing experience.

Tough Decks, Easy Decisions

Say hello to low maintenance
and peace of mind.

TimberTech® combines beauty and integrity. Our decks have the look and feel of real wood with the added durability of composite materials. They are capped on all four sides and built to resist mold and mildew, outperforming both traditional lumber and other capped wood composites. With TimberTech you get low maintenance with long-term durability and cost savings.

Pressure Treated Wood

The appeal of traditional lumber often fades as quickly as its quality. Without staining, sealing, and frequent maintenance, pressure treated wood can splinter or warp in the first few years, becoming expensive and time-consuming.

TimberTech Capped Wood Composite

Capped composite boards are made of plastic and wood fibers and coated with our proprietary protective, durable cap. While most manufacturers neglect the bottom and side grooves, we coat all four sides, offering the charm of wood with added strength that comes from material science.

Select the Right Material

	Pressure Treated & Soft Woods	TimberTech® Capped Wood Composite

Traditional: Tigerwood decking with Pecan accents and RadianceRail® in Kona®

Americana: Antigua Gold®

Coastal: Stone Ash™ decking and RadianceRail in White

Casual Contemporary: Ashwood

Eclectic: Tigerwood decking with Caribbean Redwood® accents and Evolutions Rail in Black

Standing Up to the Elements

Perched on the edge of the Canadian coastline in Nova Scotia's extreme weather, this deck was built to last.

Beauty and Strength

Designed to be an outdoor room and true extension of the home, this award-winning deck spans more than 1,000 square feet and includes a large dining area, outdoor kitchen, sitting area, and fire pit.

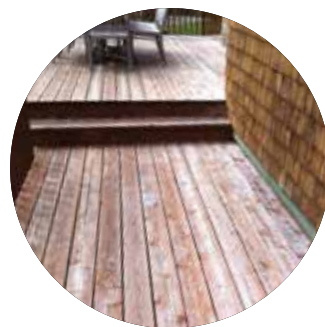

It also incorporates the home's natural setting, an ocean view and original stone walls, to showcase the beautiful surroundings and create an open space perfect for outdoor entertaining.

The owners selected TimberTech® decking in Pecan with Mocha accents from the Legacy Collection to bring this low-maintenance outdoor space to life. Known for its proven durability and strength, TimberTech resists stains, scratches, mold, and moisture damage and is the perfect choice for Nova Scotia's snow, wind, rain, and sun. The deck is finished and framed with Evolutions Rail® Contemporary in Traditional Walnut. They chose a combination of glass infills and balusters to complement the scenery.

Before: Cedar

THE DOWNSIDE OF WOOD

To retain color, cedar decks need to be cleaned and resealed every year or two, and even then it's a losing battle. And with a 1,000 square foot deck, that's no small job. TimberTech is the low-maintenance solution.

Decking

We give our decks the chops they need to battle almost anything Mother Nature—or your family—throws their way. But we don't sacrifice beauty for backbone. So kick off your shoes, light up the grill, and enjoy your deck.

Let's Get Decked Out

Craft a deck as beautiful and lasting as the memories you'll create on it.

Collections

Offering a versatile palette from rustic to refined, saturated to subdued, TimberTech® has the perfect look for your family's favorite new hangout. And because our decking is more durable and long-lasting than traditional wood, you can be confident the color and texture of your deck will last for years of summertime stargazing and backyard barbecues.

Good

TERRAIN COLLECTION

Complement Mother Nature's natural aesthetic with earthy, adaptable hues, understated grains, and a texturized surface. Available in solid and variegated colors.

Better

TROPICAL COLLECTION

Evoke feelings of a beachside paradise with sun-soaked, saturated tones with authentic, multi-color streaking and the embossed texture of real wood.

Best

LEGACY COLLECTION

Stay true to the classics with a hand-scraped, artisan look-and-feel reminiscent of indoor hardwood flooring.

TwinFinish[®], DockSider[™], & ReliaBoard[®]

DockSider Decking: Gray

TwinFinish Decking: Gray

TwinFinish Decking: Cedar

TwinFinish® & DockSider™

These wood composite collections combine beauty and function. Both available in warm Cedar and crisp Gray, TwinFinish features a VertiGrain slip-resistant surface, while DockSider is robust enough for heavy-use public places like marinas or boardwalks.

Color Choices

ReliaBoard®

Available in traditional Cedar and Gray, the ReliaBoard Collection strikes a balance between traditional aesthetic and affordable value, making a low-maintenance, long-lasting deck accessible on any budget.

Color Choices

Depending on environmental conditions, all TimberTech® wood composite colors may appear to change over time as part of the natural weathering process.

Railing

After you select your decking, create a high-end, finished look you can be proud of by framing your space with beautiful railing.

Technical Information

Capped Wood Composites

Composite decking capped with a fully protective polymer shell that resists the elements every deck endures.

Product Name	Plank Dimensions	Square Shouldered Lengths			Grooved Lengths			12" Fascia	7¼" Riser
		12'	16'	20'	12'	16'	20'	12'	12'
Terrain	.94" x 5.360"		•	•	•	•	•	•	•
Tropical	.94" x 5.360"		•	•	•	•	•	•	•
Legacy	.94" x 5.360"		•	•	•	•	•	•	•

Although TimberTech deck products are cooler to the touch than many other deck board products in similar colors, all decking products will get hot in the sun. Additionally, the darker the decking color, the hotter it will feel. For hotter climates, consider choosing a lighter color. While the product is designed to resist fading, no material is fade proof when subjected to years of exposure to ultraviolet (UV) rays and the elements. For more details visit www.TimberTech.com/warranty-and-care.

The deck applications depicted in this brochure are for display purposes only and not for the purpose of validating the suitability, warrantability or safety of any particular installation or application of the product. Always consult the TimberTech® Installation Instructions as well as local building codes to ensure proper installation.
